LogiWare

Isn't it time you found a software partner that can help improve your business.

Logiware offers an end-to-end logistics software platform specifically designed for international freight forwarders and NVOCC's. Our software will improve your profitability, keep your shipments on schedule, make your operations more efficient, provide customers with self-serve and tracking access, and speed up your response time. Our services can help scale your business and handle peak periods.

Based in Atlanta with an office in Bangalore, India, Logiware is growing fast as a leader in innovation. Our software can provide the technology advantage you need to compete in a fast-changing global economy.
