

# LogiWare

## A better software platform for global shipping

### Keep your Shipments on Schedule

Your staff will be able to see all of the tasks needed to keep shipments on schedule with the most important ones at the top of the list.

As tasks are completed, automatic notifications and documents can be sent

As tasks are completed, automatic notifications and documents can be sent

### Take Your Customer Service to the next level

Your customers and agents will be able to see the key milestones and status of their shipments online at any time.

Customers can receive automatic notifications as tasks and milestones are completed.

Self-service functions like quotes, reports, and document access help improve your customer access and productivity.

### Improve your Profitability

Logiware's Rate Management System helps you maintain carrier, truck, and rail costs so that you can have accurate rates on demand and provide faster quotes.

Internal, agent, and warehouse/CFS costs and markups can be setup and easily managed in your shipments.

Logiware provides visibility of cost changes and profit thresholds, while data analytics and reports help you understand where you are making and losing money.

### Increase Your Operational Efficiency

With Logiware EDI you will be able to exchange information electronically with carriers, truckers, shippers, agents and others, faster and more accurate.

Logiware's integrated accounting system will enable operational costs and charges to be in the accounting system instantaneously and operations to have visibility of customer and vendor payments and credit hold situations.

### Scale your business

Logiware's staffing team can help you scale your business and handle peak loads by outsourcing almost any shipment task.
